HILPRECHT'S USEFUL DREAMS

VISIONS THAT TOLD HIM HOW TO DECIPHER INSCRIPTIONS.

Two Cases in Which the Scientist Whose Work Dr. Peters Questions Was Helped to Get Results While He Slept-In One a Priest Told Him a Translation.

At the meeting of the American Oriental Society in Springfield, Mass., next Thursday, the Rev. Dr. John P. Peters is going to read a paper. Dr. Peters's secretary said yesterday that the paper would bear upon the Hilprecht controversy and that until it was read Dr. Peters would have absolutely nothing to say for publication about Prof. Hilprecht or the issues that are now being sifted by the committee of investigation in Philadelphia.

The fact that Prof. Hilprecht has had some curious experiences in the matter of dreams, in connection with his Assyriological researches is being recalled by some of those who have been following the controversy closely. As long ago as 1897, Andrew Lang, in his volume "The Book of Dreams and Ghosts," related one very remarkable adventure of this nature that Prof. Hilprecht had and touches upon

Dr. Peters's secretary said yesterday that these dream episodes in connection with Prof. Hiprecht's studies had been brought to Dr. Peters's attention some time ago, but that Dr. Peters had no comment to make upon them.

One of the most remarkable of these revelation dreams which have came to Prof. Hilprecht is the one attributed to the night of a Saturday-Sunday in March,

According to the accepted version of this story, it seems that all of the day before Prof. Hilprecht had been engaged in trying to decipher the inscription on two small fragments of agate. The fragments were supposed to be broken pieces of finger rings, and from the nature of the characters engraved on them Prof. Hilprecht was inclined to date them anywhere from 1140 to 1700 B. C.

The first character of the fourth line seemed to read "K U," and Prof. Hilprecht was inclined to believe they might stand for Kurigalzu, a King of that name. But beyond this guess he could not go. He turned and twisted the bits of agate and looked at them under powerful magnifying glasses and in all conceivable lights

nifying glasses and in all conceivable lights and angles. He could make nothing of them. Finally at midnight, quite worn out. Prof. Hilprecht went to bed.

He had been in bed but a short time, he is quoted as saying, before he had a remarkable dream. A tall, thin priest of the old pre-Christian Nippur suddenly stood revealed to him. The priest appeared to be about 40 years of age.

He led Prof. Hilprecht to the treasure chambers of the Nippur temple on its northeast side and there into a small, low-ceilinged room without windows, in which was a large wooden chest, while scraps of agate and lapis lazuli lay scattered on the

agate and lapis lazuli lay scattered on the floor. There the priest addressed the pro-fessor as follows:

fessor as follows:

"The two fragments belong together. They are not finger rings and their history is as follows:

"Kurigalzu once sent to the temple of Bel, among other articles of agate and lapis lazuli, an inscribed votive cylinder of agate. Then the priests suddenly received the command to make for the statue of the god Nibib a pair of earrings of agate. We were in great dismay, since there was no agate as raw material at hand. In order to execute the command there was nothing to execute the command there was nothing for us to do but cut the votive cylinder in three parts, thus making three rings. Each of these rings contained a part of the

Each of these rings contained a part of the original inscription...

"The first two rings served as earrings for the statue of the god. The two fragments which have given you so much trouble are parts of those rings. If you will put them together you will have confirmation of my words. But the third ring you have not found yet, and you never will find it."

Then the long thin priest vanished.

oted as testifying that he bounded out of bed and ran about the room crying:
"It is so! It is so!" Mrs. Hilprecht at
length corralled the excited professor, and the two of them confirmed the words of the long, thin priest. The professor translated the inscription, after putting the broken fragments together, to read as follows:

TO THE GOD NIBIB, CHILD OF THE GOD BEL,

UIS LORD KURIGALZU,
FONTIFEX OF THE GOD BEL,
HAS PRESENTED IT.

It was drawings of the agate fragments that the Professor had been studying, not the originals, and in these drawings the fragments were of different colors, so that a student working on the drawings would not guess them to be parts of one cylinder. Prof. Hilprocht, however, examined the two actual fragments in the Imperial Museum at Constantinople. They lay in two distinct cases, but when put together stred. When cut samider the white vein fitted. When cut asunder the white vein of the stone showed on one fragment, the gray surface on the other. Still another dream revelation is credited

to Prof. Hilprecht. It occurred in 1883. Prof. Hilprecht in that year was working on a translation of an inscription wherein came the words: "Kal u - Kucursu - Usur." came the words: "Katu-Kucursu-Usur."
These words had been translated by Prof.
Delitzsch as "Mebo protect my mortar
board." Prof. "Hilprecht had accepted
this translation and went to bed one night
fully believing it to be the correct one.

In his sleep he had a vision which revealed to him that the correct translation was not "Nebo protect my mortar board," bit
"Nebo protect my mortar board," bit
"Nebo protect my boundary." This last
translation Prof. Hilprecht then and there
adopted, and the story of the dream says
it has been the accepted one among scholars ever since.

Aged Woman Missing.

Mrs. Catherine Reubold, 80 years old. of 270 Irving avenue, Brooklyn, was reported to the police last night as missing since Friday last. The aged woman is said to be slightly demented, and having recently moved from 107 East Ninetieth street, Manhattan, it is feared that she attempted to return to her old home.

FIRE IN SOMMERVILLE HOUSE.

Occupied by E. C. Potter-Neighbors Discovered It-Old Lady Helped Out. There was a fire last night in the old Sommerville mansion at 328 West Eightysixth street, which Eugene Clifford Potter occupies. It started in a servant's room in the rear and was seen by a resident of Eighty-fifth street about the time Prof. E. R. A. Seligman, who lives at 324 West Eighty-sixth street discovered it too. Prof. Seligman called up Fire Headquarters to summon the engines and then he went out to aid his neighbors.

Neither Mr. Potter nor his wife was at home, but Mrs. Potter's mother was there with two of the Potter children, Etta and Dixon. Miss Etta Potter helped her grandmother out of the house, with the assistance Prof. Seligman. Judge Edward E. McCall lives across the way, and he also went over to see if he could be of assistance.

The firemen put out the fire quickly and was confined to the room in which it started. It was caused by a curtain blowing against a gas jet.

\$100,000 A YEAR CITY MUST PAY. Bill to Give the County Clerk This Patronage

Sald to Mean Birrell. What is described by some local Republican leaders as a specimen of the bills which Billy Halpin promised to have passed at Albany for the benefit of the city at large was introduced a few days ago by Assemblyman Beihilf of the Thirty-first district, of which Tax Commissioner Strasbourger is the leader. It provides for the appointment of a Commissioner of Records for the county of New York, and if passed will call for the expenditure by the city of \$100,000 a year. The bill has passed the Assembly and is now in the rules committee.

The real purport of it has apparently escaped notice at Albany, but down here in New York it is beginning to be commented on, and the belief in the minds of many who have read it is that it has been framed in the interest of Deputy County Clerk Henry Birrell, who will go out of office at the end of this year with County Clerk Thomas L. Hamilton.

The bill provides that within ten days after the passage of the act the County Clerk shall appoint a Commissioner of Records for a term of six years, and that the duty of the new commissioner shall b to prepare indices of mortgages and other records of the Register's and Surrogate's

to prepare indices of mortgages and other records of the Register's and Surrogate's offices and to have translated into English the old Dutch records in those offices.

The commissioner is to get \$0,000 a year and is empowered under the bill to appoint deputies. assistants, clerks and laborers and to incur a yearly expenditure not exceeding \$100,000, which it is made mandatory on the Board of Estimate to appropriate. The commissioner and his staff are also to be provided with quarters in the new Hall of Records.

Mr. Birrell is fighting Herbert Parsons for the leadership of the Twenty-fifth district. He has the support of the Odell-Halpin crowd, while Mr. Parsons has always refused to take orders from Mr. Odell or Halpin. County Clerk Hamilton sailed for Europe last week. According to report, he is going to see Odell. Mr. Hamilton is being talked of as the possible Republican choice for Mayor. Birrell, it is known, is boosting along the idea, and there is no doubt in the minds of most of those who have read the Beihilf bill that if it is passed Hamilton will make Birrell the new commissioner. With the \$100,000 a year strong following to shout for the nomina-tion of Hamilton, as well as to help in the effort to oust Parsons from the leadership of the Twenty-fifth.

FOUND HER HUSBAND AT LAST. Wasn't in Jall, but in a Boarding House With the Leading Lady.

Eugenie Beck hurried into police headquar-As for the professor. Mrs. Hilprecht is ters this morning only to learn that she had been the victim of a trick to get money. Yesterday she received the following despatch:

Mrs. Beck, 625 East Eleventh street, New York:
Send \$45 at once. I am arrested. Must
get out to-day. Send money by telegraph
to Worcester, Mass.
B. Beck.

At noon two well dressed men called for the answer at the telegraph office. One said his name was Beck. Both men were taken to Police Headquarters where they denied that either was Beck, but said they had been sent by Beck to obtain the message. They said they were members of a Hebrew theatrical company owned by Beck.

Police inspectors found Beck at a boarding house with the leading woman of the company. He admitted to her that he sent the telegram to his wife, but when he gct to police headquarters he was positive he didn't send the telegram.

ENDS CARPENTERS LOCKOUT Long Fight Between New Union and Na-

tional Brotherhood Settled. The long feud between the Greater New York Carpenters' Union, the new organization formed by the employees and the Brotherhood of Carpenters, was ended last night. At a special meeting of the new union, in Teutonia Hall, Third avenue between Fifteenth and Sixteenth streets, it was voted to accept the charter offered by the national officers of the brotherhood. This was the condition under which the lockout was to have been declared off, so the action last night ends also the fight between the brotherhood and the employers'

This action will be only a matter of form and will leave the 9,000 members of the brother-hood free to work for members of the em-ployers' a sociation. They will have the same rights as the new union.

The southwestern storm was central over Texas esterday and caused snow in Colorado and rain in Nebraska and southward to Texas. The weather was cloudy and unsettled in the central valleys, the Lake regions and the Gulf and Middle Atlantic

States, and was fair on the South Atlantic coast and from the Rocky mountains westward. In this city it was fair in the morning, cloudy in the afternoon; wind light to fresh west; average humidity, 48 per cent.; barometer, corrected to read to sea level, at 8 A. M., 30.39; 3 P. M., 50.17. The temperature yesterday, as recorded by the fficial thermometer, is shown in the annexed table:

The Truth about Whiskey

Blended or Compounded Whiskies have been characterized recently (in certain newspaper interviews) as spurious whiskey. Nothing could be further from the truth. Whiskey, scientifically blended from different ages, and particularly when, as in the case of Sitsons Rye, all the whiskies used in the blend come from the same distillery, is just as pure whiskey as two glasses of water from the same spring would, if mixed, still be pure water. Straight bottled in bond whiskey is whiskey that is not blended, that has been watched by the internal revenue inspector and actually under his control from the time the grain is introduced to the mash until the government stamp or seal is placed on the bottle and the whiskey is marketed.

Sittory Rye is sold both "blended" and "straight,"

In either form it is Sitsory Rye-just the same as has been made for 50 years at Gibsonton, Pa.
